

*Well it is that time of the year again so get cosy
with the June edition of*

Library Corner

CHEST May 2007

Spirometer Calibration Checks: Is 3.5% Good Enough?

Meredith C. McCormack, David Shade, and Robert A. Wise

Chest May 2007: 1486–1493.

Peak Expiratory Flow Is Not a Quality Indicator for Spirometry: Peak Expiratory Flow Variability and FEV₁ Are Poorly Correlated in an Elderly Population

Matthew J. Hegewald, Michael J. Lefor, Robert L. Jensen, Robert O. Crapo,

Differential Flow Analysis of Exhaled Nitric Oxide in Patients With Asthma of Differing Severity

Caterina Brindicci, Kazuhiro Ito, Peter J. Barnes, and Sergei A. Kharitonov

Chest May 2007: 1353–1362.

Correspondence

There Are No Excuses for Not Performing Spirometry in Acute Asthmatics in the Emergency Department Setting

Gustavo J. Rodrigo

Chest May 2007: 1615

A late addition from Graham Hall:

Creating an Academic Career in Respiratory Medicine: Take-Home Messages From a Unique Symposium

Natalja Skrebova Eikje and J. Patrick Barron

Chest 2007;131:1967-1969
