Subject: Erratum

Dear Brennan

I write to advise that there have been two errors in the reference equations in this manuscript.

- In Table 3 for LogPEF the height parameter should be 0.56 (not 0.056 as currently stated).
- In Table 3 for DLCOAdj \dot{V}_A the height variable should read - 0.40 (not -0.04).

I am hoping it might be possible to publish an erratum and change the reference equations accordingly in the online version. Please do not hesitate to contact me for clarification if required. I apologise for the errors in this manuscript.

With kind regards.

Richard
